

Consider making a Difference in the Life of A Child – Foster & Adoptive Families Needed - In Yolo County over 350 children (newborn babies, toddlers, grade school age youth, and teens) are in foster care at no fault of their own. Almost half of those children will not be able to return to their biological parents and will be adopted from foster care. We are trying to promote local foster homes in Davis, so that children can stay enrolled in their school, maintain friendships and continue to live in their community. When no local homes are available, so much is lost for the child, not only is their family life in turmoil, most often the child is placed miles away and their losses compound. Help us keep this from happening again by building a stronger local system of foster families in Davis and Yolo County. Join us in our efforts to make a difference for local youth who find themselves in difficult situations – in foster care at no fault of their own. Do you have room in your home and your heart?
